Microsoft

PROJECTS

Systems Tech Human Resources Management Systems

12/2024 - 03/2025

Systems Technologies Limited

Led the development of a comprehensive Human Resource Management System that streamlined employee data management and HR processes. Designed and implemented robust data structures and efficient algorithms to handle complex personnel information. Created a secure API framework that facilitated seamless integration between backend systems and the responsive frontend interface. The solution significantly improved HR operations by automating routine tasks, enhancing data accuracy, and providing real-time access to critical employee information across departments.

IDEAS

06/2024 - 10/2024

Sidmach Technologies

Designed and implemented a comprehensive analytics dashboard that monitors registered user activity in real-time. Engineered an interactive data table displaying detailed user records with advanced filtering and search capabilities, enabling efficient data analysis and user management.

Clickpay

01/2023 - 09/2023

Systems Technologies Limited

Developed and implemented the transaction history tracking system and digital wallet functionality for the mobile application, ensuring secure financial operations and providing users with transparent access to their complete payment records.

Systems Tech Website

08/2022 - 12/2022

Systems Technologies Limited

Developed the landing page of the company official website
